

**产品名称：吗氯贝胺**  
**产品别名：Moclobemide**

**生物活性：**

<b>Description</b>	Moclobemide(Ro111163) is a reversible monoamine oxidase inhibitor (MAOI) selective for isoform A (RIMA) used to treat major depressive disorder. Target: Monoamine Oxidase Moclobemide orally administered 2 hours before decapitation preferentially inhibits MAO-A and PEA in rat brain with ED50 of 7.6 $\mu\text{mol/kg}$ and 78 $\mu\text{mol/kg}$ , respectively. Moclobemide orally administered 2 hours before decapitation preferentially inhibits MAO-A and PEA in rat liver with ED50 of 8.4 $\mu\text{mol/kg}$ and 6.6 $\mu\text{mol/kg}$ , respectively. Moclobemide (0.1 mM), which inhibits brain MAO-A activity by over 80%, does not affect benzylamine oxidase (rat heart) and diamine oxidase (rat small intestine) activity in vitro [1]. Moclobemide (10 mM-100 mM) includes in the culture medium during anoxia or with glutamate significantly increases in a concentration-dependent manner the amount of surviving neurons compared to controls in neuronal-astroglial cultures from rat cerebral cortex [2]. Moclobemide (10 mg/kg p.o.) induces a significant decrease of all monoamine metabolites measured in rat brain [1]. Moclobemide, given via the drinking water (4.5 mg/kg/day), produces significant decreases in adrenal weight of rats after 5 (-23%) and 7 weeks (-16%) of treatment. Moclobemide upregulates hippocampal mineralocorticoid receptor (MR) levels in rats by 65%, 76% and 19% at 2 weeks, 5 weeks and 7 weeks of treatment, and upregulates Glucocorticoid receptor (GR) levels in this limbic brain structure by 10% at 5 weeks. Moclobemide treatment (5 weeks, 4.5 mg/kg/day) significantly attenuates stress (30 min novel environment)-induced plasma ACTH (-35%) and corticosterone (-29%) levels [3].																												
<b>In Vitro:</b>	<p>DMSO : 100 mg/mL (372.11 mM; Need ultrasonic)</p> <table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th rowspan="2"></th> <th>Solvent</th> <th>Mass</th> <th rowspan="2">Concentration</th> <th rowspan="2">1 mg</th> <th rowspan="2">5 mg</th> <th rowspan="2">10 mg</th> </tr> <tr> <th></th> <th></th> </tr> </thead> <tbody> <tr> <td rowspan="3" style="text-align: center;">Preparing Stock Solutions</td> <td>1 mM</td> <td>3.7211 mL</td> <td></td> <td>18.6053 mL</td> <td></td> <td>37.2107 mL</td> </tr> <tr> <td>5 mM</td> <td>0.7442 mL</td> <td></td> <td>3.7211 mL</td> <td></td> <td>7.4421 mL</td> </tr> <tr> <td>10 mM</td> <td>0.3721 mL</td> <td></td> <td>1.8605 mL</td> <td></td> <td>3.7211 mL</td> </tr> </tbody> </table> <p>*请根据产品在不同溶剂中的溶解度选择合适的溶剂配制储备液 一旦配成溶液, 请分装保存, 避免反复冻融造成的产品失效。</p> <p>储备液的保存方式和期限: -80°C, 6 months; -20°C, 1 month。 -80°C 储存时, 请在 6 个月内使用, -20°C 储存时, 请在 1 个月内使用。</p>		Solvent	Mass	Concentration	1 mg	5 mg	10 mg			Preparing Stock Solutions	1 mM	3.7211 mL		18.6053 mL		37.2107 mL	5 mM	0.7442 mL		3.7211 mL		7.4421 mL	10 mM	0.3721 mL		1.8605 mL		3.7211 mL
