

产品名称: MLN2480

产品别名: TAK-580; BIIB-024

生物活性:						
Description	TAK-580 (MLN 2480) is an orally active and selective inhibitor of pan-Raf kinase.					
IC₅₀ & Target	RAF[1]					
In Vitro	TAK-580 (MLN 2480) has effect on reversing feedback activation of MEK in response to TAK-733, leading to more concerted MAPK pathway inhibition[1].					
In Vivo	TAK-580 (MLN 2480) inhibits MAPK pathway signaling in BRAF mutant and some RAS mutant preclinical cancer models at concentrations that are tolerated in vivo. TAK-580 (MLN 2480) is most potent in BRAF mutant melanoma models but also has single agent activity in some RAS mutant models. The combination of MLN2480 with TAK-733 inhibits the growth of a broader range of RAS mutant tumor models than single agent TAK-580 (MLN 2480), including primary human tumor xenograft models of melanoma and CRC[1].
