产品名称: **Mebhydrolin Napadisylate**

产品别名: 美海屈林萘二磺酸盐: **Mebhydroline 1,5-naphthalenedisulfonate salt**

生物活性:	
Description	Mebhydrolin napadisylate is a specific histamine H ₁ receptor antagonist.
IC₅₀ & Target	Histamine H1-receptor[1]
In Vitro	Mebhydrolin is a specific histamine H ₁ -receptor antagonist with minimal sedative properties and comparing it with the effects of chlorpromazine, the archetypical phenothiazine[1]. Mebhydrolin exerts an antihistaminic effect over the period of the ethanol interaction study[2].
